WHAT INFORMATION IS AVAILABLE ON THE 2006-07
OUS DEFINED PEER GROUP COMPARISON OF FACULTY SALARIES?

Data are collected according to criteria
defined by the AAU Data Exchange (AAUDE).
See footnotes on reports for more detail.

Average salary by rank compared to UO or OUS Defined Peer Group overall
average salary. Indication of relative standing in relationship to all UO or OUS
Defined Peer Group faculty included in the study.

Weighted Averages: Prior to 2006, only average salaries were presented on these reports. The departmental, school or college, and overall averages were, and continue to be, weighted by the FTE distribution within a department, school or division, or the UO as a whole. This is also true for the respective AAU peer group. However, the FTE distributions for the UO and the AAU peer group within a comparison group (department, school/college, overall) are often not the same. The “All Ranks Weighted” line was added to provide analogous data for the UO and the respective AAU peer group by making both groups “look” the same. The FTE distributions within a department, school or division, or the institution as a whole were weighted at 35% Professor, 30% Associate Professor, and 30% Assistant Professor for both the UO and the OUS Defined Peer group. This weighting scheme is a standard scheme based on the “ideal” faculty distribution.

In addition, the overall OUS Defined Peer group average salary for the College of Arts and Sciences was weighted by the UO FTE distribution across the Humanities, Natural Science, and Social Science discipline groups. The overall institutional average salary for the OUS Defined Peer group was also weighted by discipline, using the UO FTE distribution across all schools, colleges, and CAS divisions. Data from the Robert D. Clark Honors College were not included in this particular weighting scheme.
