Appendix

Data Sources

The student data used in the report are extracted from Banner during the fourth week of October by the Registrar. A student's information is based on their gender and federal category of race/ethnicity at the time of the extract from Banner. The comparison to the Association of American Universities is based on data submitted to the Integrated Postsecondary Education Data System (IPEDS) as part of their student data submission. For the purposes of the comparisons, only public institutions are used. The Oregon demographic data are provided by the U.S. Census Bureau.

Definitions

Race and Ethnicity:

Students of color include Asian, Black, Hispanic, Native American, Pacific Islander, and Multi-Ethnic (or Two or More Races). Beginning in Fall 2010, a change in federal requirements in how race and ethnicity are collected make comparisons over time problematic. The new methodology may artificially increase the number of students identified as Hispanic. The reporting group Asian and Pacific Islander was disaggregated into two groups: Asian and Native Hawaiian / Pacific Islander. The category Two or More Races reflect the counts for individuals selecting more than one race category rather than the category Multi Ethnic. Because the University of Oregon has not resurveyed its students using the updated federal guidelines, only new students are subject to the new format. International students are those who have a citizenship attribute of nonresident alien.
